Navigating New Pet Ownership

Problem Statement

New pet owners are unsure how to train and care for pets day-to-day, especially when advice online is contradictory and not tailored to their pet.

Research Work Flow

First let's break down the Working Flow

Defining Research Questions & Objectives	Internet Overview	Trends and Market Tendencies
Survey	Market & Competitor Mapping	SWOT Analysis & Benchmarking
Gap Identification & Opportunity Mapping	Conclusions from market & competitors research	Refining the Target Audience
Personas	Synthetic interviews	Depth interviews
Thematic coding	Conclusion	Defining our Strategic Advantage (UVP)

Research Question

How do new pet owners make care and training decisions, and what barriers prevent them from trusting existing digital information sources?

Objectives

Defining the parameters that lead users to prefer one information source over another

Understand the factors that prevent them from implementing the advice they find online

Identifying the core problem – where a market solution is most needed

Market Overview

TheMarker

Market Research

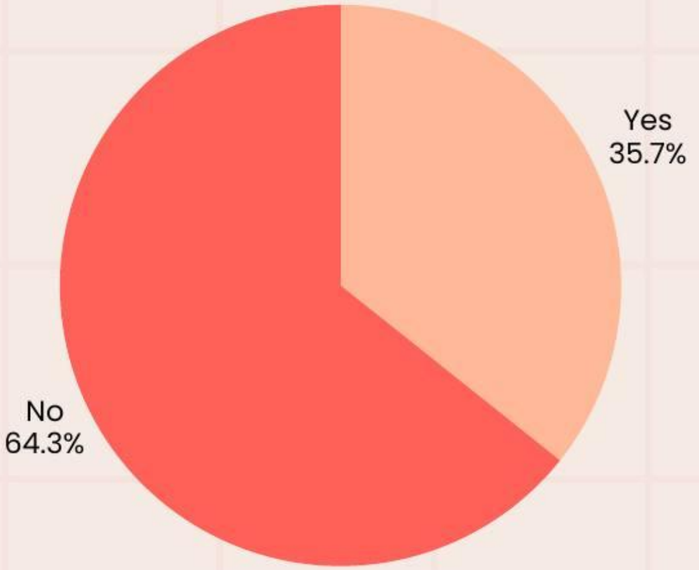

What is your primary source of information when making decisions regarding pet training or health?

On a scale of 1 (Not at all) to 5 (Extremely), how much do you trust the info on apps or social media?

Have you ever used training tutorial videos?

Market Research

What would lead you to prefer an app over direct human interaction?

- Certainty regarding the **professional** quality of the content
- Discounts on food products and supplies
- **Personalized** content and **reliable** information
- If I received positive feedback on the app's usage
- Access to **24/7 help** from a **trusted source** (like a call center)
- If it's included in the pet's insurance
- Price & Reliability
- **Credibility** backed by **certificates** and references to relevant studies
- Positive user feedback and **proven experience**
- Proven success and **evidence-based** results
- **Certified Professionals**
- Added value and availability of a **professional** for **real-time** answers

Direct Competitors

Category	Competitor	Core Value	High Data-Driven	Reliability	Availability	Cost	Customized	Weaknesses
Training Apps		Skill & Trick Building	Medium (App Tracking)	High (Expert Content)	Instant 24/7	Low (Freemium)	Medium (Generic Tracks)	Static content, Lack of holistic care
In-Person Training		Behavioral Expert & Socializing	No(Manual/ Notes)	High	Low (Subject to trainer availability)	High	High - Maximum	Expensive, Limited availability, Inconsistent methods
Remote Vet Consulting		Medical Peace of Mind	Yes (Medical Records)	Very High (Licensed Vets)	Instant 24/7	Medium (Sub)	High (Direct Consult)	Health focus, No physical exam /hands-on support

Indirect Competitors

Category	Competitor	Core Value	High Data-Driven	Reliability	Availability	Cost	Customized	Weaknesses
Communities		Peer Support & Empathy	No	Low (Unverified)	High	Free	Low (Generic peer advice)	Mixed advic, Judgmental environment
Content Sites		Trusted Sources	No	Very High	Instant 24/7	Free	None (Static articles)	Static & Passive info, Information overload - No active guidance
AI Tools		Instant Answers	Medium	Low (Unverified)	Instant 24/7	Free	Medium (Prompt-dependent)	Risk of Inaccuracy, Non-Tailored Context, Inconsistent

Opportunities

- Cost expert services (Trainers/Vets)
- The "Filter" Demand: Users seek a single, vetted source to eliminate online noise and conflicting advice
- Holistic Integration: Opportunity to merge Health & Training into one unified, non-fragmented journey
- Knowledge to Action: Shifting from static reading (AKC) to actionable tasks within the owner's schedule
- Contextual AI: General AI is generic, pet-specific personalization using professional data is required

Target Audience

Demographics: Israeli residents, ages 16-60 (Singles, roommates, and families).

Socio-Economic Status: Middle-class with the financial capacity and willingness to invest in professional care.

Lifecycle Stage: New pet owners within their first 12 months of adoption.

Species Focus: Exclusively targeting Dog and Cat owners.

Meet Our Owners

Ori & Yael, 27&29 - Young couple

First-time primary owners

Network Usage: Social media-driven and AI-reliant for pet related information
Main Pain Points: Property damage caused by Luka's severe separation anxiety.
Goals & Needs: Train Luka to remain home alone calmly while gaining confidence in their shared parenting.
Motivation: Providing a top-tier city life as a test of joint responsibility.
Current Solutions: Sourcing guidance via friends, social media & AI tools.

Shoolamit, 45 - Divorced

First-time cat owner

Network Usage: Driven by deep research, from Reddit communities to scientific behavioral blogs
Main Pain Points: Lack of trust, the cat 'Simba' is extremely fearful.
Goals & Needs: To resolve the trust crisis with Simba.
Motivation: Finding deep purpose in providing a second chance to a cat that others might have given up on.
Current Solutions: Hours dedicated to validating information across niche forums and professional.

Who are the interviewees ?

Synthetic Interviews

Synthetic Interview

In-depth Interviews

Experts

"What's the main mistake of a new pet owners?"

"What kind of emotions describes best new pet owners?"

Users

"Describe a specific moment where you felt completely helpless"

"What is/was your biggest challenges with your new pet?"

And the most important question - WHY?

Thematic Coding

Theme/ Interviewee	User Insight (Omri, Adi, Tomer, Noa)	Expert Insight (Vet, Trainer)
Health Anxiety & Panic	Hysterical Response: New owners react with immediate panic to minor physical changes. **Quote: "Ran straight to the clinic for a small lump that was nothing."**	"Guilt" Diagnosis: Owners are driven by a fear of making a critical mistake. **Quote: "The dominant emotion is anxiety mixed with guilt."**
Info Overload & Trust	Cognitive Dissonance: Users are overwhelmed by contradictory advice from social media vs. experts. **Quote: "Confusing overload from forums vs. TikTok."**	Trust Barrier: Owners hesitate to accept professional advice if it contradicts a viral video. **Quote: "Difficulty building trust in the face of 'digital noise'."**
Lack of Personalization	The Generic Failure: Standard advice fails to address breed-specific or character-specific needs, as also in fourms or online tips. **Quote: "The Chat didn't know the specific food for our breed", "wish i could get a specifc guidnece for my cat breed.**	Biological Variance: Treatment and training must be adapted to the specific animal's genetics and history. **Quote: "Must know the 'normal' state of the specific animal."**
Expectations vs. Reality	Responsibility Shock: The actual burden of destruction and training is far higher than anticipated. **Quote: "The pet is a totally different story than what we imagined." "its important to make sure the pet matches your life style"**	Process Misconception: Owners often expect "magic solutions" without understanding the training marathon. **Quote: "Owners want a fix in one session; training is a habit."**

Conclusion

Expert-backed knowledge and vetted veterinary data that provides users with certainty and trust

Instant, affordable, and digital-first support that removes the cost and availability barriers of private trainers

Tailored daily tasks and context-aware guidance that turns generic advice into actionable steps

GTM& Product Strategic

The Roadmap to Market Success

- **Partner with certified experts** (trainers/vets) to establish platform credibility and trust.
- **Hyper-Personalization:** Custom app design and specialized roadmaps tailored to popular local breeds.
- **Unified Holistic Care:** Merge behavioral training and medical wellness into one seamless, 360° dashboard.
- **Israelis does not like to pay for trainings app:** Hybrid Freemium model integrating pet insurance to drive conversion beyond digital training.

Any Barks?
